

Project: PROTECTION ONSITE

case study

Newly built in Monteverdi, near the capital Beirut, this villa is distinguished by its spectacular view, design and glass facades.

Since the villa includes three skylights and 700sqm of glass, glass protection is a necessity in order to save time and effort. Therefore, the glass was treated with ClearShield products.

The result is a glass surface that looks like new. Dirt can be easily removed with normal cleaning methods, and the glass stays cleaner for longer.
